Guide to developing the Annual Implementation Plan: for Improving Student Outcomes

To focus effort where it is most needed, four priorities have been identified for the entire Victorian government school system. The four priorities are:

- Excellence in teaching and learning
- Professional leadership
- Positive climate for learning
- Community engagement in learning.

Six evidence-based initiatives assist schools to identify and utilise the most effective, relevant and evidence-based strategies that when implemented with consistency and depth help drive improved student outcomes. The initiatives are associated with the four state-wide priorities, in the following way (please refer to the *Framework for Improving Student Outcomes: Guidelines for schools*):

Priority	Initiatives
Excellence in teaching and learning	Building practice excellence: Teachers, principals and schools will work together
	Curriculum planning and assessment: School will embed a culture of curriculum planning, and assess the impact of learning programs, adjusting them to suit individual student needs
Professional leadership	Building leadership teams: Schools will strengthen their succession planning, develop the capabilities of their leadership teams in using evidence
Positive climate for learning	Empowering students and building school pride: Schools will develop approaches that give students a greater say
	Setting expectations and promoting inclusion: Schools will work across their communities to implement support to health, wellbeing, inclusion and engagement of all students
Community engagement in learning	Building communities: Schools will strengthen their capacity to build relationships with the broader community by partnering

To guide the development of the 2016 Annual Implementation Plan: for Improving Student Outcomes (AIP) schools will work with support from Senior Education Improvement Leaders (SEIL) to conduct an annual evaluation of student outcomes data against the targets set in their School Strategic Plan. Schools then diagnose the issues requiring particular attention and select one or more initiative.

Principal and teacher performance and development plans include explicit links with the AIP and the School Strategic Plan. This ensures a line of sight from school improvement priorities and initiatives to each individual's plan. The *Guidelines* provide further context and detailed information to support this work.

Initiatives Rationale:

Explain why the school, in consultation with the SEIL, has selected this initiative/s. Please make reference to the evaluation of school data, the progress against SSP targets, and the diagnosis of issues requiring particular attention.

In 2014 Epsom Primary School was involved in a priority review, as a result of this there were several areas that needed addressing. During 2014/15 the school implemented School Wide Positive Behaviours and Star Values. This has significantly curbed the number of level 2 and 3 behaviours. When reviewing the recommendations from the review alongside the strategic plan, it was evident that our next area of focus needed to primarily focus on Building teacher capacity and curriculum planning/ assessment. When John Sloan came in as a consultant to review the implementation of the school values and SWPB, his sentiments also on building teacher capacity.

The Leadership team reviewed the Relative growth of 2015 in the NAPLAN to analyse effectiveness and to set achievable goals for 2016. These targets are to be seen as stepping-stones towards our long-term goals. We saw a major focus on reducing low growth, to move it towards medium growth. It is important to note that strategies that are implemented in 2016 may have some short term effect, however, growth is likely to be more evident in data from 2017 and possible internal data such as on demand.

Key Improvement Strategies (KIS)

List the KIS that are linked to this initiative/s and will be scaled up. This could include existing KIS from your SSP or new ones identified through the evaluation of student outcomes against SSP targets and the diagnosis of issues requiring particular attention. KIS may be specific to one outcome area or applicable across several areas.
